This book provides clinicians, clinicians-in-training and researchers with a unique rapid-access educational resource on the spectrum of issues at the intersection of skin and malignancy. In it, there is clinical detail provided on how the skin reveals systemic malignancy via cutaneous metastases, genodermatoses or paraneoplastic dermatoses. At the same time, it reviews pharmacologic treatment of internal malignancy and how this can result in cutaneous adverse reactions; conversely, therapeutics for skin conditions can increase risk for internal malignancy. As arguably the most significant cutaneous malignancy, melanoma receives specific attention for its metastatic potential, current diagnostic advances, and recent therapeutic breakthroughs. Dermato-Oncology Study Guide: Essential Text and Review serves a critical educational need for clinicians caring for patients with systemic malignancy by creating an easy-to-use resource that provides practical tools to recognize skin signs of internal malignancy. Furthermore it helps in anticipating and managing adverse reactions of therapeutics for systemic malignancy, and gives the reader the opportunity to weigh the risks of malignancy of pharmacologic agents for skin disease. Environmental Information Systems in Industry and Public Administration provides an overview of worldwide research and development on Environmental Information Systems (ENVIS). This book is the only topical documentation of the highly innovative approach of information systems for environmental protection. Issues are covered from the global and multinational level to industrial solutions for enterprises. The increase and changes in the demand for emergency care require pro-active responses from the designers and implementers of the emergency care system. The role of Emergency Care Practitioner (ECP) was introduced in England to improve the delivery of emergency care in the community. The role was evaluated using cost-benefit approach and compared with other existing emergency care roles. An analysis of the cognitive elements (situation awareness (SA) and naturalistic decision making (NDM)) of the ECP job was proposed considering the mental efforts involved. While the cost-benefit approach can justify further spending on developing the role, a cognitive approach can provide the evidence in ensuring the role is developed to fulfil its purpose. A series of studies were carried out to describe SA and NDM amongst ECPs in an ambulance service in England. A study examined decision-making process using Critical Decision Method interviews which revealed the main processes in making decision and how information was used to develop SA. Based on the findings, the subsequent studies focus on the non-clinical factors that influence SA and decision making. Data from a scoping study were used to develop a socio-technical systems framework based on existing models and frameworks. The framework was then used to guide further exploration of SA and NDM. Emergency calls that were assigned to ECPs over a period of 8 months were analysed. The analysis revealed system-related influences on the deployment of ECPs. Interviews with the ECPs enabled the identification of influences on their decision-making with respect to patient care. Goal-directed task analysis was used to identify the decision points and information requirements of the ECPs. The findings and the framework were then evaluated via a set of studies based on an ethnographic approach. Participant observations with 13 ECPs were carried out. Field notes provided further insight into the characteristics of jobs assigned to the ECPs. It was possible to map the actual information used by the ECP to their information needs. The sources of the information were classified according to system levels. A questionnaire based on factors influencing decision-making was tested with actual cases. It was found that the items in the questionnaire could reliably measure factors that influence decision-making. Overall, the studies identify factors that have direct and indirect influences on the ECP job. A coherent model for the whole emergency care systems can be developed to build safety into the care delivery process. Further development of the ECP role need to consider the support for cognitive tasks in light of the findings reported in this thesis. This highly successful text sheds new light on the basic physiological and molecular mechanisms of asthma, how current treatments work, and how best to apply the latest knowledge to control this important disease. The Third Edition has undergone radical revision and includes several new chapters. It retains the virtues of the previous volumes by bringing together all of the recent research findings by internationally recognized experts on the causative mechanisms of asthma, including in-depth clinical aspects and therapy. The book presents an integrated approach toward the treatment of this disease with new concepts, changes in asthma management, and the development of new therapeutic agents. Asthma provides extensive references for researchers and clinicians who need to keep abreast of recent developments in this rapidly expanding field. Comprehensive coverage of both basic science and clinical aspects of asthma Extensively referenced throughout Contemporary missions often include evangelistic and socio-economic dimensions. For effective missions, some way of assessing what is being achieved is needed beyond just the common metrics touching on the spiritual and/or economic which neglects social transformation that ideally should also be occurring. This book seeks to identify key factors for holistic evaluation based on salient characteristics that emerged as three Entrepreneurial Church Planting sites were studied in San Francisco (Redeemer Community Church), Selma, Alabama (Blue Jean Church), and Lynch, Kentucky (Meridzo Ministries). What emerges from these case studies is the importance of relationality, general emphasis on growth and development, and a well-established focus on holistic transformation. The mechanisms for the operation of holistic transformation are spelled out to reflect the operation of the three actors of the Trinity in missions. The practical component of the book is the conceptual framework that reveals the operation of holistic transformation and ways to measure the dynamic relationships that occur. The A+ Exams are being updated to cover the latest PC technologies. This edition provides complete coverage of all objectives for both the core hardware and operating systems exams. The CD-ROM features full practice exam software.
