What do you need to know to teach computing in primary schools? How do you teach it? This book offers practical guidance on how to teach the computing curriculum in primary schools, coupled with the subject knowledge needed to teach it. This Seventh Edition is a guide to teaching the computing content of the new

Primary National Curriculum. It includes many more case studies and practical examples to help you see what good practice in teaching computing looks like. It also explores the use of ICT in the primary classroom for teaching all curriculum subjects and for supporting learning in every day teaching. New chapters have been added on physical computing and coding and the importance of web literacy, bringing the text up-to-date. Computing is both a subject and a powerful teaching and learning tool throughout the school curriculum and beyond into many areas of children's learning lives. This book highlights the importance of supporting children to become discerning and creative users of digital technologies as opposed to passive consumers. "Early treatment of computer law was no more than the application of existing principles to novel sets of facts. Today, it has been recognized generally that computing technology does indeed give rise to unique legal problems which are not resolvable by applying

existing legal principles. This is particularly apparent where transactions are carried out through the exchange of digital information rather than human interaction. The developing law which seeks to resolve these problems is at the heart of the latest edition of this book, now established as a standard text on computer law for students, practitioners, and business in general for whom information technology is an integral part of their daily activities."--BOOK JACKET.
