quality and increased cost effectiveness. In this stunning picture book, Steve Jenkins takes us to Mount Everest - exploring its history, geography, climate, and culture. This unique book takes readers on the ultimate adventure of climbing the great mountain. Travel along and learn what to pack for such a trek and the hardships one may suffer on the way to the top. Avalanches, frostbite, frigid temperatures, wind, and limited oxygen are just a few of the dangers that make scaling this peak one of the most extreme physical challenges one can experience. To stand on the top of Mount Everest is to stand on top of the world. With informative text and exquisitely detailed cut paper illustrations, Steve Jenkins brings this extreme journey alive for young adventurers. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Management of riparian habitats is controversial because land use policies have historically emphasized economic values (e.g., timber production) at the expense of ecological and social values. Attempting to manage these valuable resources to attain the greatest combination of benefits has created a long-term controversy that continues to the present. Our analysis indicates that at mid to large spatial scales, healthy riparian ecosystems and land management activities are not mutually exclusive, but the degree of compatibility is determined by policy decisions based on competing demands and pressing timelines as well as available scientific knowledge. Current management schemes on federal lands in the Pacific Northwest and Alaska are appropriately addressing large spatial scales and incorporating the principles of disturbance ecology. We found no scientific evidence that either the default prescriptions or the options for watershed analysis in the Northwest Forest Plan and Tongass Land Management Plan provide more protection than necessary to meet stated riparian management goals. We believe that additional alternative riparian management strategies could be implemented and evaluated in concert to shorten the time needed to realize effective strategies that fully meet riparian

management goals. Following a deadly car crash, small-town lawyer Lance Cooper risked everything to battle one of the most powerful auto corporations in the world to get justice for a young woman. A fast-paced, journalistic account of tragedy turned to triumph, despair to hope, Cobalt Cover-Up is an inspirational, thoroughly compelling, and victorious read. In the midst of his own family struggles, small-town Georgia lawyer Lance Cooper agreed to defend Ken and Beth Melton and investigate the deadly accident that killed their daughter Brooke after she inexplicably lost control of her Chevy Cobalt. But what started as a heartbreaking yet all too common lawsuit quickly escalated into a David vs. Goliath case when Cooper discovered shocking evidence that General Motors concealed an ignition switch defect for nearly a decade--resulting in 124 deaths, including Brooke's, and risking the lives of millions more. Despite GM's settlement offers and attempts to bury evidence, Cooper refused to back down and worked tirelessly to expose the truth. Locked in a tenacious legal fight, Cooper and the Meltons faced incredible odds--Ken and Beth losing jobs and suffering the difficulty of grieving a beloved daughter during a court battle, Cooper risking his reputation and private practice against the overwhelming opposition from GM's team of lawyers, and both parties facing massive financial strain. Yet, in the relentless pursuit for justice and to protect future innocent lives, this small-town lawyer and a working-class American couple stared down the biggest US auto manufacturing mogul and ultimately transformed the entire industry. This is the official study guide version 3 for the ILCP Exam, as approved by the Institutional Locksmiths' Association national Board of Directors in 2013, replacing the version 2 which had been written by John Truempy in 2003.
