Fighting in a World on Fire Oct 26 2020 Young people are inheriting a world of climate catastrophe. Young people are also one of the strongest forces leading movements for climate justice, and to halt the fossil fuel emissions that are making our Earth unlivable. As Greta Thunberg and the Fridays for the Future movement have made clear, solutions offered by adults are far too little, far too late: the measures in unenforceable international agreements won't halt our reliance on fossil fuels, or take the drastic steps humans need to take in order to keep our planet livable. What kinds of drastic steps are needed? What kind of bold actions can the climate justice begin using to bring a stop to climate destruction, and that can be employed alongside existing strategies of mass protest, awareness, and legal appeals? Why does our society consider profit for oil companies more important than the future of young people and the health of our shared environment? In this adaptation of Andreas Malm's best-selling book on the need for a bolder, more confrontational climate justice movement, these urgent questions are brought to the most important audience of all: those who are growing up in a world on fire.

How to Be Invisible Jun 14 2022 For most of us, privacy means an unlisted telephone number. But what about your Social Security number? Your credit card numbers? Your bank account statements? Your personal health data? You may think this information is also secure, but if you've ever ordered anything over the Internet, or if your credit card is on file at the local video store just in case you never return that copy of Titanic, or if you throw out bank statements without shredding them, then this information is now in the public domain and can easily be discovered and used against you by a private eye, a computer hacker, or even a vengeful neighbor or former lover. Once people gain control of even a shred of your personal information, they can gain control of your life. They can transform this information into access to your assets, your loved ones, even your identity. And once your privacy is gone, there's very little you can do to get it back. J. J. Luna, a highly trained and experienced security consultant, can show you how to achieve the privacy you crave, whether you just want to shield yourself from casual scrutiny or take your life savings and disappear without a trace. He reveals the shocking secrets that private detectives use to uncover information, and then shows you how to safeguard against them. Filled with vivid real-life stories drawn from the headlines and from Luna's own consulting experience, *How to Be Invisible* is the essential guide to preserving your personal security. Privacy is commonly lamented as the first casualty of the Information Age-- but that doesn't mean you have to stand for it.
