For fans of high-concept thrillers such as Annihilation and The Girl with All the Gifts, this breathtaking dystopian psychological thriller follows an American academic stranded at a Swiss hotel as the world descends into nuclear war—along with twenty other survivors—who becomes obsessed with identifying a murderer in their midst after the body of a young girl is discovered in one of the hotel's water tanks. Jon thought he had all the time in the world to respond to his wife's text message: I miss you so much. I feel bad about how we left it. Love you. But as he's

waiting in the lobby of the L'Hotel Sixieme in Switzerland after an academic conference, still mulling over how to respond to his wife, he receives a string of horrifying push notifications. Washington, DC has been hit with a nuclear bomb, then New York, then London, and finally Berlin. That's all he knows before news outlets and social media goes black—and before the clouds on the horizon turn orange. Now, two months later, there are twenty survivors holed up at the hotel, a place already tainted by its strange history of suicides and murders. Those who can't bear to stay commit suicide or wander off into the woods. Jon and the others try to maintain some semblance of civilization. But when the water pressure disappears, and Jon and a crew of survivors investigate the hotel's water tanks, they are shocked to discover the body of a young girl. As supplies dwindle and tensions rise, Jon becomes obsessed with investigating the death of the little girl as a way to cling to his own humanity. Yet the real question remains: can he afford to lose his mind in this hotel, or should he take his chances in the outside world?

The remarkable biography of a mother of ten who stepped up to run her late husband's ironworks in Victorian Wales. When impoverished aristocrat Lady Charlotte Bertie married wealthy Welsh ironmaster John Guest of Dowlais in 1833, her relatives looked on with dismay. Yet despite their vast difference of background and age, over their nineteen-year long marriage husband and wife enjoyed great happiness and much adventure. There would be ten children, and while John built up an immense commercial empire, Charlotte championed Welsh culture. Crucially, she taught herself John's business from the inside. Over the years, she made the keenest observation of iron production, the fluctuations of the trade, and the engineering innovations. When John died in 1852, she was therefore uniquely placed to succeed him as head of the works—a remarkable position for a Victorian woman. She endeavored to introduce reforms, but also—rather to her dismay—had to weather a potentially destructive strike. But success came at a price. With her star seemingly in the ascendant, Lady Charlotte suddenly chose to abandon all, leave Wales, and marry her sons' tutor. This book traces the ardent, creative years of her first marriage, explores her determination to preserve John's legacy as a widow, and observes her growing devotion to the scholarly Charles Schreiber. A Guest of the Reich is the incredible

true story of Gertrude “Gertie” Legendre, an American heiress taken prisoner by the Nazis. Born into a wealthy family, Legendre lived a charmed life in Jazz Age America. But when the Japanese attacked Pearl Harbor, she joined the OSS—the wartime spy organization that preceded the CIA—and headed to Europe. In 1944, while on leave, Legendre accidentally crossed the front lines along the Luxembourg–Germany border and was captured. The Nazis treated her as a “special prisoner” of the SS and moved her from city to city throughout Germany, where she witnessed the collapse of Hitler’s Reich as no other American did, before escaping into Switzerland. A gripping portrait of a multifaceted and deeply fascinating woman, *A Guest of the Reich* is a propulsive account of a little-known chapter in the history of World War II. The scientific and practical interest in coronands (crown ethers), cryptands, podands as complexing agents for cations as well as for anions and neutral low molecular species is undeniable 1,2). The chemistry of crown compounds is steadily increasing. About 250 original papers dealing with crown chemistry appeared only in 1980. New molecules with crown ether properties are constantly synthesized and new applications discovered. Owing to lack of space, only a small number of the original publications is mentioned here. Thus, in the literature compilation

only some, but relevant works are selected for each chapter. Whenever possible, reference is made to reviews or review-like articles alone by means of which original works can be consulted. The reviews given under ref. 1) are considered to be the most relevant. The formulae presented in the figures should be understood as representative structures outlining a specific field.

2 Classification of Oligo-/Multidentate Neutral Ligands and of their Complexes Today

a distinction is made between the classical ring oligoethers (crown ethers) and monocyclic coronands, oligocyclic spherical cryptands and the acyclic podands with respect to topological aspects 3). This classification and the topology are illustrated in Fig. 1, each figure representing the minimum number of donor atoms and chain segments characteristic of each class of compounds. Multidentate mono cyclic ligands with any type of donor atoms are called coronands ("crown compounds"), while the term crown ether should be reserved for cyclic oligoethers exclusively containing oxygen as donor atom.
