Potential Wadge Classes Jun 01 2021 Let Γ be a Borel class, or a Wadge class of Borel sets, and \aleph_α a cardinal. A Borel subset B of \mathbb{R}^d is potentially in Γ if there is a finer Polish topology on \mathbb{R}^d such that B is in Γ when \mathbb{R}^d is equipped with the new product topology. The author provides a way to recognize the sets potentially in Γ and applies this to the classes of graphs (oriented or not), quasi-orders and partial orders.

Ecole D'ete de Probabilites de Saint-Flour Feb 09 2022 Lecture Notes in Mathematics This series reports on new developments in mathematical research and teaching - quickly, informally and at a high level. The type of material considered for publication includes 1. Research monographs 2. Lectures on a new field or presentations of a new angle in a classical field 3. Summer schools and intensive courses on topics of current research Texts which are out of print but still in demand may also be considered. The timeliness of a manuscript is sometimes more important than its form, which might be preliminary or tentative. Details of the editorial policy can be found on the inside front-cover of a current volume. Manuscripts should be submitted in camera-ready form according to Springer-Verlag's specification: technical instructions will be sent on request. TEX macros may be found at: <http://www.springer.de/math/authors/b-tex.html> Select the version of TEX you use and then click on "Monographs". A subject index should be included. We recommend contacting the publisher or the series editors at an early stage of your project. Addresses are given on the inside back-cover.
