This book examines the manner in which successful firms develop, transfer, protect, and capture value from technological innovation. In essence, it is about “knowledge management”, which lies at the foundation of firm level competitive advantage in today's global economy. The essays contain some of the fundamental contributions to the field of knowledge management by one of its best-known thinkers; they also constitute an immensely practical guide for those managers who wish to look below the surface of what is going on in Silicon Valley and elsewhere.

Contents: Capturing Value from Technological Innovation Sustaining Value Creation and Capture Licensing, Technology Transfer, and the Market for Know-How Technological Change and Competition Policy Technological Innovation and the Theory of the Firm

Readership: Professionals and academics in management studies. Keywords: Reviews: “Anyone interested in strategy or policy towards knowledge industries will learn much from this collection, written throughout with the elegance and lucidity which is a hallmark of Teece's work.”

This book, the first of two volumes, highlights the concept of financial inclusion from the Islamic perspective. An important element of the Sustainable Development Goals (SDGs), financial inclusion has been given significant prominence in reform and development agendas proposed by the United Nations and G-20. The significance of Islamic financial inclusion goes beyond improved access to finance to encompass enhanced access to savings and risk mitigation products, as well as social inclusion that allows individuals and companies to engage more actively in the real economy. It represents one of the important drivers of economic growth. Gender disparity exists within financial access and its extent varies widely across world economies. South Asia, the Middle East and North Africa have the largest gender gaps, with women in these regions being forty per cent less likely than men to have a formal account at a financial institution. Analysing how Islamic financial inclusion can empower individuals, this volume explores the contribution of Islamic microfinance in achieving SDGs and solving income and wealth inequality. Comprising a combination of empirical evidence, theory and modelling, this edited collection illustrates how to improve access to finance, making it essential reading for those researching both Islamic finance and development finance. A critical input into the proceedings of this Expert Consultation were two discussion papers and 12 cases studies, contained in this document. The first discussion paper addresses the basic requirements and principles for successful management of shared fish stocks derived from game theoretical considerations and practical

experiences. The second discussion paper presents the legal aspects of the management of shared fish stock.
