Hasnt everything that should have been said been said? No, I would argue. The shortcoming that troubles me most about the books I am familiar with is their failure to provide perspective on what math technique and the use of technology can do for us and its limitations. This can only be addressed through vigorous and sustained use of the mathematical modeling perspective, which is a hallmark of this books exposition. A point continually stressed is that reaching a mathematical answer to a problem is not the end of the story. It is in a sense the end of a chapter, but the next chapter is concerned with questions about whether and how the mathematical answer should be implemented. Also addressed is the question of what to consider when more than one answer is obtained for a problem. This book contains 9 exam papers and it is aimed at May/June 2019 GCSE Mathematics examination for higher level. These papers are written according to the new 9 to 1 syllabus mainly for Edexcel, however they can still be used as practice for AQA and OCR exams as well. Each section contains 3 exam papers labelled paper 1, paper 2 & paper 3 similar to the actual exam. International Conference on Engineering Education and Research This book covers the technology of the recovery of secondary fibre for its use in paper and board manufacture. The editor, who has had substantial practical experience of designing and commissioning paper recycling plants all over the world, leads a team of experts who discuss subjects including sourcing, characterisation, mechanical handling and preparation and de-inking.
