Gregory Korenstein-Jasperton is an 11-year-old boy who likes to write stories and poems and is not excited by math, but he has a problem--he is the middle child in a family of math geniuses and his father expects him to participate in the City Math project contest. Who hasn't experienced this: you are late or have forgotten an appointment, missed a birthday or even your wedding day, or you haven't yet managed to complete an important task. You got a bad grade at school, you can't concentrate, you can't or don't want to give a presentation, you or your colleague can't be reached, something breaks, you don't feel like cooking or cleaning the house--time and again you find yourself in unpleasant situations where you don't have the right idea. It's no longer hard to know what to do, because among the 1,111 (and more) excuses, evasions, white lies and fibs, you are sure to find one that will quickly provide you with a good explanation. An entertaining, original and often humorous compilation of ten stories about this and other worlds. They include Britain under the rule of Spain following the successful invasion by the Spanish Armada, the alien spy whose mission on Earth is hampered when he gets hooked on music, a world where society is strictly controlled and livestock is banned and the man who inadvertently brought about "the end of civilisation as we know it." Some stories have been published in magazines, one in an anthology and another shortlisted for a literary prize. Their settings range from the London sewers to outer space and from the eighteenth century to the far future. Remember all the small falsehoods you were told as a child, from carrots helping you see in the dark to Santa checking up on

your behaviour all year round? This book will guarantee laughs as you reminisce on the bizarre tales your younger self believed. And if you now have your own little rascals to look after, it might provide you with some invaluable lies for when you want them to behave. Sometimes it's the only way! Romp your way through medieval England with a man who thinks raisins are what remain of grapes after the wine gets squeezed out, and then try solving two murders. Fibs is at it again! Ever wish you could go to the Moon? Well, Fibs has been there. Just ask him! Fibs and his brother, Moppy, go on a fun-filled journey that is truly out of this world. Rocket cars, outer space creatures, and one great imagination pack tons of fun into a boring old homework assignment! But maybe Ms. Gromp will believe him this time. I guess you'll just have to read it and see! Success had turned its back on Charlie. He had no job...and no direction. The love of his life had left him unexpectedly. He didn't like what he saw in the mirror...and his self-esteem had reached rock bottom. Life has gotta' be way better than this...right? But then a beach-walking, bird-feeding, Zen-like master changed everything Charlie was feeling...by redirecting everything that Charlie was thinking. Want to change your direction? Read *The Four Fibs* and see what happens to thought and attitude when we drop the distorted illusion created by believing life's four biggest lies. A hilarious compendium of history's most outrageous lies as told by the world's greatest liars! Pinocchio might be the world's most famous liar, but everyone from your long distance operator to the milkman has participated in mankind's greatest foible. *Would I Lie to You?* is a hilarious compendium of history's biggest, funniest and most newsworthy lies, as told by the most outrageous liars in the world. Rutledge details the background behind the untruths, and lets the liars do all the talking. *Honest. Would I Lie to You?* includes the mundane: "I was just picking up the phone to call you! "We paid that bill two months ago". "I haven't had cosmetic surgery.."and the monumental: "Approximately 80% of our air pollution stems from hydrocarbons released by vegetation". -- President Ronald Reagan, 1981 "Of all the treasures a State can possess, the human lives of its citizens are for us the most precious". -- Joseph Stalin After Finn tells his grandmother a fib, his lies continue to build up which makes Finn feel horrible until he builds up the courage to come clean. In this funny story, Franklin learns it's always better to tell the truth. Applies Fibonacci numbers to the stock market. Ross Pitca shows us how we can use these naturally occurring true fib numbers to increase profitability-regardless of your trading style or of market trends. In this book, we have attempted to produce a reference on high resolution focused ion beams (FIBs) that will be useful for both the user and the designer of FIB instrumentation. We have included a mix of theory and applications that seemed most useful to us. The field of FIBs has advanced rapidly since the application of the first field emission ion sources in the early 1970s. The development of the liquid metal ion source (LMIS) in the late 1960s and early 1970s and its application for FIBs in the late 1970s have resulted in a powerful tool for research

and for industry. There have been hundreds of papers written on many aspects of LMIS and FIBs, and a useful and informative book on these subjects was published in 1991 by Phil Prewett and Grame Mair. Because there have been so many new applications and uses found for FIBs in the last ten years we felt that it was time for another book on the subject. Take a look in the mirror. The human body has baffled doctors and scientists for thousands of years. Sometimes the truth is more complicated than we originally thought. Get the real facts about your body, and drop the fibs! WINNER OF THE 2018 CARMEL BIRD DIGITAL LITERARY AWARD Beth Spencer's award-winning collection crosses boundaries of genre, time, history and desire; meditating on how we create ourselves through culture and stories, and why it matters. An Angel is suspended in protest beneath a forest-green canopy; a girl watches Bewitched and dreams of being part of a coven; a man struggles to wrest back control of his story; and the cast of Fatal Attraction is let loose on the streets of Newtown. Memories of football and class, museums, tv families, Barbie dolls, and growing up in the age of Fibs bras and the rise and fall of the Whitlam government. From the author of the critically acclaimed How to Conceive of a Girl, this collection seamlessly interweaves past & future, the critical & nostalgic, the experimental & the intimate. 'Gives vivid insights into the small and large moments of the human story. It was a great pleasure to encounter this gem.' - Carmel Bird 'Spencer's work brims with energetic, provocative, and idiosyncratically stylish writing.' - Felicity Plunkett 'Consistently thought-provoking, compelling, and rich with humour and complexity.' - Magdalena Ball Miguel Fibs! is about a little boy who has a reputation of being very good. Everyone, including his mother, father, and teacher, sees him as a very good little boy. He knows it is expected of him so he wants to be good. However, rather than to erase that image, he tells fibs to cover up that he is not always good. Then, his conscience starts to bother him, and he imagines seeing images in the mirror and becomes afraid. After a long period of worry, he confesses to his parents about his lies, explaining that he is not a good boy. His parents warmly explain that all people are bad sometimes and assure him that he is most certainly still a good boy. This garden of fibs and sin has roses that are red with blood. Daniel Patrick Darling II is gorgeous, rich, and conceited, with just the right amount of bitch. You may think he has it all; friends, money, power, but all those things won't help Danny when he mysteriously vanishes one night after hanging out with his best friends. Danny is loved by few, but unfortunately hated by many. Anyone could have been behind his disappearance. This Filthy Fibbers prequel rewinds one day before Danny's disappearance. Danny rendezvous with his ex-boyfriend and has a tryst with a new secret lover. He begins to receive threatening messages from an anonymous stalker that wants to destroy him and everyone he loves. Danny has had a privileged life and now his world is about to change forever. Has Danny's insidious past finally caught up with him? He can't outrun what he did. Danny's

deadly secrets have deadly consequences and in this filthy garden full of thorns, someone is bound to be pricked. In 1202 Fibonacci Leonardo published his seminal book of mathematics, Liber Abaci, which included his description of the Fibonacci sequence of ascending numbers. Given that poetry is writing with some measure of music, and all music includes math (but math with soul), in the late 20th century poetry integrating the Fibonacci sequence emerged, and quickly became 'fibs.' In 2020, a year like no other, award-winning poet Herb Kauderer explores the double edge of fibs. One edge is life's small lies, and the other is poetry that ties back to Fibonacci's work. This book comes in three sections: Daily Fibs, Pandemic Fibs, and Fantastical Fibs. Come explore a new variation on the Liar's Club, a Fib Convention! This garden of fibs and sin has roses that are red with blood. Daniel Patrick Darling II is gorgeous, rich, and conceited, with just the right amount of bitch. "Look into the night sky. Humans have been trying to understand space for thousands of years. Sometimes the truth is more complicated than we originally thought. Get the real facts about outer space, and drop the fibs!"-- An eye opening account of how one man's obsession with saturated fat, poor science and food industry lobbying changed eating habits around the world, a change that led to an epidemic of obesity and chronic disease that is close to overwhelming our health care systems. If you need to get in shape, rethink your health or shed those extra pounds this book is for you. The diet and health food industries are big business but is the healthy option as healthy as it seems? Should we stop eating wheat, go sugar free, eat like a cave man, give up meat or eat a plant based diet? Why is diabetes close to becoming a pandemic? Why is inflammation so rampant? Why is feeding our gut key to our weight as well as our health? This book tells you everything you need to know about healthy eating and it also explains the science of why you are what you eat; why some food is good to eat, why some food is not quite so good and why some food is close to being a ticking bomb when it comes to our health.No matter what your age or your state of health it is never too late to start eating a healthy diet and a healthy diet does not have to take the fun out of eating. The

Food Fibs That Made Us Fat concludes with a simple, doable and sustainable diet, an "Always Sometimes Never Eat Diet". A guide to eating the clean, wholesome food that nature intended us to eat. No calorie counting, no meal plans, no super foods. Just tips on how to get the most out of the food you eat and delicious recipes that the whole family will enjoy. This book brings some much needed sanity back to the world of healthy eating and it will totally transform your life. Like the great books on diet, health and nutrition that have been written by Michael Mosley, Gary Taubes and Michael Pollan, this book is a very relevant read. Fibs, Facts and Fables is a collection of eight diverse and contrasting short stories from writer Nick Chapman, including some previously unpublished pieces. With the exception of 'Meeting Miss Poston' - which is a true and autobiographical piece - these are tales of fiction grown from the seeds of fact. Murder, kidnap, paternal abuse and autistic adolescence are some of the themes explored. In order to match his friends' boasts, Franklin the turtle claims that he can swallow seventy-six flies in the blink of an eye, but then he has to prove it. If you heard a radio broadcast that Martians had landed on Earth, would you believe it? In 1938 many people did. Read about many famous hoaxes-plus some silly ones, too. Gregory K is the middle child in a family of mathematical geniuses. But if he claimed to love math? Well, he'd be fibbing. What he really wants most is to go to Author Camp. But to get his parents' permission he's going to have to pass his math class, which has a probability of 0. THAT much he can understand! To make matters worse, he's been playing fast and loose with the truth: "I LOVE math" he tells his parents. "I've entered a citywide math contest!" he tells his teacher. "We're going to author camp!" he tells his best friend, Kelly. And now, somehow, he's going to have to make good on his promises. hilariously it's the "Fibonacci Sequence" -- a famous mathematical formula! -- that comes to the rescue, inspiring Gregory to create a whole new form of poem: the Fib! Maybe Fibs will save the day, and help Gregory find his way back to the truth. For every kid who equates math with torture but wants his own way to shine, here's a novel that is way more than the sum of its parts. Remember all the small falsehoods you were told as a child, from carrots helping you see in the dark to Santa checking up on your behaviour all year round? This book will guarantee laughs as you reminisce on the bizarre tales your younger self believed.
