It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the **BUSINESS** in business law. **Dynamic Business Law: The Essentials** emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on **TEACHING**. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. **Dynamic Business Law: The Essentials** contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on **CRITICAL THINKING**. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in **Dynamic Business Law: The Essentials** as well – to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further. Drawing on current scholarship, **Education and Society** takes students on a journey through the many roles that education plays in contemporary societies. Addressing students' own experience of education before expanding to larger sociological conversations, **Education and Society** helps readers understand and engage with such topics as peer groups, gender and identity, social class, the racialization of achievement, the treatment of immigrant children, special education, school choice, accountability, discipline, global perspectives, and schooling as a social institution. The book prompts students to evaluate how schools organize our society and how society organizes our schools. Moving from students to schooling to social forces, **Education and Society** provides a lively and engaging introduction to theory and research and will serve as a cornerstone for courses such as sociology of education, foundations of education, critical issues in education, and school and society. The fourth edition of Ken Browne's widely used textbook has been extensively revised to satisfy fully the AQA's AS sociology specification. The book combines sociological rigour and accessibility in a way unrivalled by any other book at this level.
