Regulation and Ethics *Oct 11 2021* Health Research Governance in Africa *Sep 10 2021* *The globalisation of research has resulted in the increased location of research involving humans in developing countries. Countries in Africa, along with China and India, have seen research grow significantly. With emerging infectious diseases, such as Ebola and Zika, emphasising the risk of public health crises throughout the world, a further increase in health research, including clinical research in developing countries, which are often the sites of these diseases, becomes inevitable. This growth raises questions about domestic regulation and the governance of health research. This book presents a comprehensive and systemic view of the regulation of research involving humans in African countries. It employs case studies from four countries in which research activities continue to rise, and which have taken steps to regulate health research activity: South Africa, Nigeria, Kenya, and Egypt. The book examines the historical and political contexts of these governance efforts. It describes the research context, some of the research taking place, and the current challenges. It also looks at the governance mechanisms, ranging from*

domestic ethical guidelines to legal frameworks, the strengthening of existing regulatory agencies to the role of professional regulatory bodies. The book analyses the adequacy of current governance arrangements within African countries, and puts forward recommendations to improve the emerging governance systems for health research in African and other developing countries. It will be a valuable resource for academics, researchers, practitioners and policy-makers working in the areas of health research, biomedical ethics, health law and regulation in developing countries.

Future Law Aug 21 2022 How will law, regulation and ethics govern a future of fast-changing technologies? Bringing together cutting-edge authors from academia, legal practice and the technology industry, *Future Law* explores and leverages the power of human imagination in understanding, critiquing and improving the legal responses to technological change. It focuses on the practical difficulties of applying law, policy and ethical structures to emergent technologies both now and in the future. It covers crucial current issues such as big data ethics, ubiquitous surveillance and the Internet of Things, and disruptive technologies such as autonomous vehicles, DIY genetics and robot agents. By

using examples from popular culture such as books, films, TV and Instagram - including 'Black Mirror', 'Disney Princesses', 'Star Wars', 'Doctor Who' and 'Rick and Morty' - it brings hypothetical examples to life. And it asks where law might go next and to regulate new-phase technology such as artificial intelligence, 'smart homes' and automated emotion recognition.

Ethical Business Practice and Regulation May 18 2022

This book explains the concepts of Ethical Business Practice (EBP) and Ethical Business Regulation (EBR), a new paradigm in compliance and enforcement based on behavioural science and ethics. EBR provides the basis for an effective relationship between a business and its regulators, resulting in better outcomes for both. EBR is attracting extensive attention from regulators and businesses around the world. The UK Government's 2017 Regulatory Futures Review draws on EBR as the foundation for its policy of 'regulatory self-assurance'. EBR draws on findings from behavioural science, responsive regulation, safety and business and integrity management to create a practical and holistic approach. Examples include the open culture that is essential for civil aviation safety, the Primary Authority agreements between regulators and national businesses, and feedback mechanisms provided by market vigilance systems and sectoral consumer ombudsmen. This book provides an essential blueprint for sustainable business and effective future regulation.

Ethics, Equity, and Regulation May 26 2020 How can we account for continuing inequalities in an era promoting enlightened social and economic connections? What mechanisms of perceptions and politics will enable policy makers and scholars to advance significant progressive change? This title examines accounting's contribution to these challenges given the profession's multifaceted roles. *Financial Services, Regulation and Ethics* Jun 07 2021 *Regulations and Applications of Ethics in Business Practice* Aug 29 2020 This book presents a variety of discussions from different countries about regulations and applications of ethics in business practice. It demonstrates how Ethics, both in the world of business and in academic life, is consistently a central and unavoidable issue that institutions must devise new regulations on a regular basis to address. Given that applying such regulations becomes complicated in a global business landscape and that International companies have lost large amounts of revenues due to fraudulent activities, the book provides insights for professionals in business world to teach, learn, apply, measure and report on companies' daily business. Business and Professional Ethics: Theories, Standards, and Analysis is essential reading for researchers and students in business schools around the world.

Media Ethics and Regulation Oct 31 2020 "This

book provides useful pointers to help journalists navigate the dilemmas they face in the professional practice. It provides an enlightening overview of the views of Mauritian journalists on their own industry and an in-depth look at the South African model for self-regulation. As part of the ethical approach, the book also reviews the main issues related to gender-sensitive reporting, in view of the significant role the media have to play in gender education.... Journalism is a public good and the need to a clear social contract is stronger than ever in a world where transparency and accountability are on the agenda. Mechanisms for ensuring ethical practice are essential and should be hailed as beacons for a stronger journalism." -- Back cover.

Healthcare Research Ethics and Law Jan 14 2022 The book explores and explains the relationship between law and ethics in the context of medically related research in order to provide a practical guide to understanding for members of research ethics committees (RECs), professionals involved with medical research and those with an academic interest in the subject. *Healthcare Research Ethics and Law* sets out the law as it relates to the functions of Research Ethics Committees (RECs) within the context of the process of ethical review and aims to be accessible and readily understood by REC members.

Each chapter begins by locating the material within the practical context of ethical review and then provides a more theoretical and analytical discussion detailing how the theory and practice fit together. The key legal issues of confidentiality, consent and negligence are addressed in detail, alongside practical guidance as to how and when liability may be incurred in these areas. In addition, the practical and legal implications of the implementation of European Directive 2001/20/EC, the Human Tissue Act 2004 and the Mental Capacity Act 2005 are considered alongside a discussion of their socio-political background and relevance for medical research in the UK.

Law and Corporate

Behaviour Nov 12 2021 This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence, economic rational acting, responsive regulation, and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models: private enforcement of law through litigation in the USA, public enforcement of competition law by the European Commission, and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory, the book then analyses various

European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services, civil aviation, pharmaceuticals, and workplace health & safety. Key findings are that 'enforcement' has to focus on identifying the causes of non-compliance, so as to be able to support improved performance, rather than be based on fear motivating complete compliance. Systems in which reporting is essential for safety only function with a no-blame culture. The book concludes by proposing an holistic model for maximising compliance within large organisations, combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders, held together by a unified core of ethical principles. Hence, the book proposes a new theory of ethical regulation.

Regulating Artificial

Intelligence Apr 24 2020

Exploring potential scenarios of artificial intelligence regulation which prevent automated reality harming individual human rights or social values, this book reviews current debates surrounding AI regulation in the context of the emerging risks and accountabilities. Considering varying regulatory methodologies, it focuses mostly on EU's regulation in light of the comprehensive policy making process taking place at the supranational level. Taking an ethics and humancentric approach towards artificial intelligence as the bedrock of future laws in

this field, it analyses the relations between fundamental rights impacted by the development of artificial intelligence and ethical standards governing it. It contains a detailed and critical analysis of the EU's Ethic Guidelines for Trustworthy AI, pointing at its practical applicability by the interested parties. Attempting to identify the most transparent and efficient regulatory tools that can assure social trust towards AI technologies, the book provides an overview of horizontal and sectoral regulatory approaches, as well as legally binding measures stemming from industries' self-regulations and internal policies.
