*Animal evolution has always been at the core of Biology, but even today many fundamental questions remain open. The field of animal 'evo-devo' is leveraging recent technical and conceptual advances in development, paleontology, genomics and transcriptomics to propose radically different answers to traditional evolutionary controversies. This book is divided into four parts, each of which approaches animal evolution from a different perspective. The first part (chapters 2 and 3) investigates how new sources of evidence have changed conventional views of animal origins, while the second (chapters 4-8) addresses the connection between embryogenesis and evolution, and the genesis of cellular, tissue and morphological diversity. The third part (chapters 9 and 10) investigates how big data in molecular biology is transforming our understanding of the mechanisms governing morphological change in animals. In closing, the fourth part (chapters 11-13) explores new theoretical and conceptual approaches to animal evolution. 'Old questions and young approaches to animal evolution' offers a comprehensive and updated view of animal evolutionary biology that will serve both as a first step into this fascinating field for students and university educators, and as a review of complementary approaches for researchers. Includes journals of the adjourned, regular and extra sessions. BPP Learning Media is an ACCA approved content provider. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success. Includes extra and special sessions. Railway RRB*

Statistical machine learning (ML) has triggered a renaissance of artificial intelligence (AI). While the most successful ML models, including Deep Neural Networks (DNN), have developed better predictivity, they have become increasingly complex, at the expense of human interpretability (correlation vs. causality). The field of explainable AI (xAI) has emerged with the goal of creating tools and models that are both predictive and interpretable and understandable for humans. Explainable AI is receiving huge interest in the machine learning and AI research communities, across academia, industry, and government, and there is now an excellent opportunity to push towards successful explainable AI applications. This volume will help the research community to accelerate this process, to promote a more systematic use of explainable AI to improve models in diverse applications, and ultimately to better understand how current explainable AI methods need to be improved and what kind of theory of explainable AI is needed. After overviews of current methods and challenges, the editors include chapters that describe new developments in explainable AI. The contributions are from leading researchers in the field, drawn from both academia and industry, and many of the chapters take a clear interdisciplinary approach to problem-solving. The concepts discussed include explainability, causability, and AI interfaces with humans, and the applications include image processing, natural language, law, fairness, and climate science. This collection of studies is in honor of Professor James A. Sanders, a leading scholar in the fields of canon of Scripture, textual criticism, and intertextuality. Contributors include leading scholars in these and related fields of study.

Despite considerable progress in clinical and basic neurosciences, the cure of psychiatric disorders is still remote, little is known about their prevention, and the etiology and molecular mechanisms of mental disorders are still obscure. Diagnoses are still guided by patients' stories. The mission of animal models is to bridge the gap between 'the story and the synapse.' Contemporary Issues in Modeling of Psychopathology attempts to do this by examining such questions as 'What good might come from such a model? Are we wasting our time? How far can we carry results from model animals, such as rats and mice, without causing a highly distorted view of the field and its goals?' This book serves as the opening volume for a new series, Neurobiological Foundation of Aberrant Behaviors. "Online updates for 2017-18 entry"--Cover.

Acetylcholinesterase (AChE) is a primary regulator of cholinergic signaling within and out of the central nervous system. It has been studied extensively for several decades, yet many basic questions about its regulation, composition and functions remain open. Thus, neither the full impact of AChE's activities on neuronal development, maintenance and functioning nor the reasons for why and how different AChE

molecular forms are being synthesized and degraded are fully known yet, although recent evidence suggests the involvement of micro-RNA regulators in both of these aspects. The identification of the anchoring proteins, PRiMA and ColQ, stimulates studies on AChE's assembly and its specific localization in the brain and muscle. Additionally, non-cholinergic function(s) of AChE has been proposed as relevant both for neuronal differentiation and cognitive functioning, whereas transgenic engineering, recombinant production and structure-function analyses of this enzyme's variants with various inhibitors paved new avenues for the development of novel Alzheimer's disease therapeutics, agricultural pesticides and prophylactics in anticipation of warfare agent exposure. The aims of this Research Topic is to provide a forum for experts in the field to critically discuss recent developments in AChE studies, initiate global critiques of the current views for resolving the fundamental questions in AChE research and promote the development of novel versions and uses of AChE-targeted agents. Topics of interest include but are not limited to: (i) post-transcriptional regulation of AChE; (ii) the non-cholinergic functions of AChE; and (iii) anti-AChE inhibitors and diseases.

Cambridge Checkpoints study guides, provide the most up-to-date exam preparation and revision available for VCE students.

What is schizophrenia? This is one of the most controversial questions in psychiatry and mental health research; however, in the last twenty years, there have been significant advances in our understanding of the topic. This book provides a balanced, comprehensive and up-to-date overview of the neuropathology of schizophrenia and its interpretation, covering the latest evidence derived from all fields of research, from brain scans to microscopy. The authors include many of the foremost international authorities in this rapidly developing field. In this unique workbook pedagogy with hands-on exercises, programming projects and a free Web-based training module, the author covers every key Oracle SQL concept: SQL\*Plus, DDL, DML, DQL, the Oracle Data Dictionary, and more!

Now that you matched or prematched, what's next? where do I live? What do I wear? What should I study and what are the things I wish I had known before starting? How do I balance my work with family? Do not look further. The Intern's Diary will guide you through every step of the way. If you are an IMG, medical student, or AMG, recent or old graduate. Or perhaps you are already in the residency training, and it's hard to get through easily. This book is the best for you. It will change you completely to a better and strong intern. Maybe you are not a medical professional, but you would like to give a gift to your loved ones in medical schools or about to start residency. This will be a great gift for them. It will answer most of your questions that you might be shy to ask your colleagues, seniors, or attendings during rounds. It has some imaging, illustrations, and list of commonly used medications as well. The pocket size makes it handy during your clinical rotations, both inpatient and ambulatory. It is designed for almost all specialties, including internal medicine, family medicine, psychiatry, and emergency medicine. Wishing the very best in your next phase of career!

Target XAT 2020 provides the detailed Solutions to XAT 2005 to XAT 2019 original Question Papers. The book also provides the topics of the essays asked in each of these XAT exam. The book also contains 5 Mock tests designed exactly as per the latest pattern of XAT. Each Mock Test has 2

parts as per the new format. Part I contains questions on Decision Making, English Language & Logical Reasoning and Quantitative Ability whereas Part 2 contains Essay Writing and questions on General Awareness on Business Environment, Economics and Polity. The detailed solution to each test is provided at the end of the book. The book also contains the list of essays asked in the last 15 years of XAT and a list of essays for practice.
