Criminal Psychology and the Criminal Justice System in India and Beyond Mar 05 2021 This book provides a focused and comprehensive overview of criminal psychology in different socio-economic and psycho-sociological contexts. It informs readers on the role of psychology in the various aspects of the criminal justice process, starting from the investigation of a crime to the rehabilitation or reintegration of the offender. Current research in criminology and psychology has been discussed to understand the minds of various offenders, how to interact with them during investigation and conviction effectively and how to bring about positive changes in various stages of the criminal justice process—investigation, prosecution, incarceration, rehabilitation—to increase the efficacy of the correctional system and improve public confidence in the justice system. It thoroughly addresses the bigger issues of holistically reducing the increase in crime rates and susceptibility in society. Each chapter builds on leading scholarship in this field from Western scholars and supplements these theories with research findings from a South Asian perspective, particularly in the Indian criminal justice system. This book successfully encapsulates the foundations of criminal psychology literature while incorporating interdisciplinary avenues of study into criminal behaviour and legal psychology, bringing into the provincial discourse lacunas of the justice system and avenues for alternative correctional and rehabilitative programs.

Intrigue and Revolution May 19 2022 Yaron Harel has constructed a dramatic story of how eleven chief rabbis all became the subject of controversy and were

subsequently dismissed. This took place against a background of crime and licentiousness rarely documented in the context of Jewish society. Set firmly in the social and political developments of the time, this colourful picture is very different from the commonly accepted image of Jewish communities in the Ottoman Empire.

Polemical Encounters Jun 20 2022 This collection takes a new approach to understanding religious plurality in the Iberian Peninsula and its Mediterranean and northern European contexts. Focusing on polemics—works that attack or refute the beliefs of religious Others—this volume aims to challenge the problematic characterization of Iberian Jews, Muslims, and Christians as homogeneous groups. From the high Middle Ages to the end of the seventeenth century, Christian efforts to convert groups of Jews and Muslims, Muslim efforts to convert Christians and Jews, and the defensive efforts of these communities to keep their members within the faiths led to the production of numerous polemics. This volume brings together a wide variety of case studies that expose how the current historiographical focus on the three religious communities as allegedly homogeneous groups obscures the diversity within the Christian, Jewish, and Muslim communities as well as the growing ranks of skeptics and outright unbelievers. Featuring contributions from a range of academic disciplines, this paradigm-shifting book sheds new light on the cultural and intellectual dynamics of the conflicts that marked relations among these religious communities in the Iberian Peninsula and beyond. In addition to the editors, the contributors are Antoni Biosca i Bas, Thomas E. Burman, Mònica Colominas Aparicio, John Dagenais, Óscar de la Cruz, Borja Franco Llopis, Linda G. Jones, Daniel J. Lasker, Davide Scotto, Teresa Soto, Ryan Szpiech, Pieter Sjoerd van Koningsveld, and Carsten Wilke.

The Psychology of False Confessions Dec 22 2019 Provides a comprehensive and up-to-date review of the development of the science behind the psychology of false confessions Four decades ago, little was known or understood about false confessions and the reasons behind them. So much has changed since then due in part to the diligent work done by Gisli H. Gudjonsson. This eye-opening book by the Icelandic/British clinical forensic psychologist, who in the mid 1970s had worked as detective in Reykjavik, offers a complete and current analysis of how the study of the psychology of false confessions came about, including the relevant theories and empirical/experimental evidence base. It also provides a reflective review of the gradual development of the science and how it can be applied to real life cases. Based on Gudjonsson's personal account of the biggest murder investigations in Iceland's history, as well as other landmark cases, The Psychology of False Confessions: Forty Years of Science and Practice takes readers inside the minds of those who sit on both sides of the interrogation table to examine why confessions to crimes occur even when the confessor is innocent. Presented in three parts, the book covers how the science of studying false confessions emerged and grew to become a regular field of practice. It then goes deep into the investigation of the mid-1970s assumed murders of two men in Iceland and the people held responsible for them. It finishes with an in-depth psychological analysis of the confessions of the six people convicted. Written by an expert extensively involved in the development of the science and its application to real life cases Covers the most sensational murder cases in Iceland's history Deep analysis of the 'Reykjavik Confessions' adds crucial evidence to understanding how and why coerced-internalized false confessions occur, and their detrimental and lasting effects on memory The Psychology of False Confessions: Forty Years of Science and Practice is an important source book for students, academics, criminologists, and clinical, forensic, and social psychologists and psychiatrists.

Understanding World Jury Systems Through Social Psychological Research Nov 25 2022 This volume examines diverse jury systems in nations around the world. These systems are marked by unique features having critical implications for jury selection, composition, functioning, processes, and ultimately, trial outcomes. These unique features are examined by applying relevant social psychological research, models and concepts to the central issues and characteristics of jury systems in those nations using a wide variety of jury procedures. Traditionally, research that has been conducted on juries has almost exclusively targeted the North-American jury. Psychologically-based research on European, Asian and Australian juries has been almost non-existent in the past decade or more. Yet, the incidence of jury trials outside of North America has been steadily increasing as more nations (e.g., Japan, Spain, Russia, and Poland) adopt, revise, or expand their use of juries in their legal system. Accordingly, research has been appearing in the scientific literature on new developments in world juries (particularly in Spain, Japan, and Australia). This volume fulfils the dual purpose of understanding the diverse practices in world juries in light of existing social psychological knowledge and applied research on juries in each nation, and outlining new research in the context of the issues raised by jury practices beyond those of North America.

The Science of False Memory Aug 30 2020 Publisher Description

Wrongful Convictions and Miscarriages of Justice Feb 16 2022 This innovative work builds on Huff and Killias' earlier publication (2008), but is broader and

more thoroughly comparative in a number of important ways: (1) while focusing heavily on wrongful convictions, it places the subject of wrongful convictions in the broader contextual framework of miscarriages of justice and provides discussions of different types of miscarriages of justice that have not previously received much scholarly attention by criminologists; (2) it addresses, in much greater detail, the questions of how, and how often, wrongful convictions occur; (3) it provides more in-depth consideration of the role of forensic science in helping produce wrongful convictions and in helping free those who have been wrongfully convicted; (4) it offers new insights into the origins and current progress of the innocence movement, as well as the challenges that await the exonerated when they return to "free" society; (5) it assesses the impact of the use of alternatives to trials (especially plea bargains in the U.S. and summary proceedings and penal orders in Europe) in producing wrongful convictions; (6) it considers how the U.S. and Canada have responded to 9/11 and the increased threat of terrorism by enacting legislation and adopting policies that may exacerbate the problem of wrongful conviction; and (7) it provides in-depth considerations of two topics related to wrongful conviction: voluntary false confessions and convictions which, although technically not wrongful since they are based on law violations, represent another type of miscarriage of justice since they are due solely to unjust laws resulting from political repression.

Detecting Doping in Sport Oct 20 2019 *The book explores the changing landscape of anti-doping investigations, which now largely centre on the collection of intelligence about doping through processes such as surveillance, interviews with witnesses and interrogation of athletes. It examines why and how investigative processes, hitherto typically reserved for serious crimes, have been co-opted by anti-doping agencies into a situation where their potential for harm has received little or no critical consideration. This book highlights the opportunities and threats inherent in adopting new investigative processes. It is expected that many of the same problems that have engulfed forensic investigations over the last two decades, such as miscarriages of justice, are likely to surface in future anti-doping investigations. Drawing on empirical research and theory from a range of disciplines, including: forensic psychology, criminology, policing, law, sports management and policy studies, this book fills a scholarly vacuum on the investigation of doping through non-biological detection methods.*
