The Balance of Payments Statistics (BOPS) Yearbook provides tables of data, featuring regional and world totals of balance of payments and IIP components and aggregates as well as detailed information in the form of analytical and standard component presentations for economies. It is compiled in accordance with the IMF's Balance of Payments Manual (BPM6). The Balance of Payments Statistics Yearbook is usually published in December. This volume presents an up-to-date review of the advances being made in all aspects of phagocyte biology. The papers presented cover the nature and chemical properties of the phagocyte, its functions and movements in the body, and how it interacts with other cells its role as part of the immune system. Composed of international economic transactions data, BOPS delivers critical statistical information that covers: total goods, service income, and current transfers an economy receives from or provides to the rest of the world; capital transfers and change in each economy's external financial claims and liabilities; tables featuring area and world totals of balance of payments.

and IIP components and aggregates. The IMF Balance of Payments Statistics contains over 200,000 quarterly and annual time series data. The data include aggregate as well as detailed information in the form of analytical and standard component presentations for countries. Additional documentation is included with descriptions of methodologies, compilation practices, and data sources used by individual member countries in compiling their balance of payments and international investment position statistics.
