CLARIN Jan 13 2022 CLARIN, the "Common Language Resources and Technology Infrastructure", has established itself as a major player in the field of research infrastructures for the humanities. This volume provides a comprehensive overview of the organization, its members, its goals and its functioning, as well as of the tools and resources hosted by the infrastructure. The many contributors representing various fields, from computer science to law to psychology, analyse a wide range of topics, such as the technology behind the CLARIN infrastructure, the use of CLARIN resources in diverse research projects, the achievements of selected national CLARIN consortia, and the challenges that CLARIN has faced and will face in the future. The book will be published in 2022, 10 years after the establishment of CLARIN as a European Research Infrastructure Consortium by the European Commission (Decision 2012/136/EU).

Solid State Physics Oct 18 2019 A must-have textbook for any undergraduate studying solid state physics. This successful brief course in solid state physics is now in its second edition. The clear and concise introduction not only describes all the basic phenomena and concepts, but also such advanced issues as magnetism and superconductivity. Each section starts with a gentle introduction, covering basic principles, progressing to a more advanced level in order to present a comprehensive overview of the subject. The book is providing qualitative discussions that help undergraduates understand concepts even if they can't follow all the mathematical detail. The revised edition has been carefully updated to present an up-to-date account of the essential topics and recent developments in this exciting field of physics. The coverage now includes ground-breaking materials with high relevance for applications in communication and energy, like graphene and topological insulators, as well as transparent conductors. The text assumes only basic mathematical knowledge on the part of the reader and includes more than 100 discussion questions and some 70 problems, with solutions free to lecturers from the Wiley-VCH website. The author's webpage provides Online Notes on x-ray scattering, elastic constants, the quantum Hall effect, tight binding model, atomic magnetism, and topological insulators. This new edition includes the following updates and new features: * Expanded coverage of mechanical properties of solids, including an improved discussion of the yield stress * Crystal structure, mechanical properties, and band structure of graphene * The coverage of electronic properties of metals is expanded by a section on the quantum hall effect including exercises. New topics include the tight-binding model and an expanded discussion on Bloch waves. * With respect to semiconductors, the discussion of solar cells has been extended and improved. * Revised coverage of magnetism, with additional material on atomic magnetism * More extensive treatment of finite solids and nanostructures, now including topological insulators *

Recommendations for further reading have been updated and increased.
* New exercises on Hall mobility, light penetrating metals, band structure

Pyttersen's Nederlandse Almanak 2013 Jun 06 2021 In de Pyttersen's Nederlandse Almanak worden in vogelvlucht particuliere, overheids; en semi-overheidsorganisaties en -instellingen beschreven die ten minste een supralokaal belang dienen en primair een not-for-profit doel nastreven. De beschreven organisaties en instellingen staan geordend op werkgebied en worden ontsloten door een uitgebreid register. U kunt de Pyttersen's Nederlandse Almanak ook online raadplegen met als voordeel dat diverse categorieën geselecteerd kunnen worden. Voor meer informatie zie: www.bsl.nl.

The Routledge International Handbook of English, Language and Literacy Teaching Nov 30 2020 Reviews international research that is relevant to the teaching of English, language and literacy. This book locates research within theoretical context, drawing on historical perspectives.

Arts & Humanities Citation Index Jan 21 2020 A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

Enterprise Design, Operations, and Computing. EDOC 2022

Workshops Jul 27 2020 This book constitutes revised selected papers from the international workshops, the EDOC Forum and the Demonstration and Doctoral Consortium track, that were held at the 26th International Conference on Enterprise Design, Operations, and Computing, EDOC 2022. The conference took place in Bozen-Bolzano, Italy, during October 3-7, 2022. The conference focuses on the area of enterprise computing, this year with the special emphasis on the theme of designing and operating "Flexible Enterprises". Workshops within EDOC cover more focused topics and allow for the presentation and discussion of work that is in the earlier development stages. The 18 full and 8 short papers included in this volume were carefully reviewed and selected from 82 submissions. They stem from the following satellite events: - Workshop on Intelligent Digital Architecture, Methods, and Services for Industry 4.0 and Society 5.0 (IDAMS) - 14th Workshop on Service-oriented Enterprise Architecture for Enterprise Engineering (SoEA4EE) - 17th Workshop on Trends in Enterprise Architecture Research (TEAR) - EDOC Forum - Demonstrations Track - Doctoral Consortium
