The Peter Principle Mar 03 2021 In a hierarchy, every employee rises to the level of their own incompetence. This simple maxim, defined by this classic book over 40 years ago, has become a beacon of truth in the world of work. From the civil service to multinational companies to hospital management, it explains why things constantly go wrong: promotion up a hierarchy inevitably leads to over-promotion and incompetence. Through barbed anecdotes and wry humour the authors define the problem and how anyone, whether at the top or bottom of the career ladder, can avoid its pitfalls. Or, indeed, avoid promotion entirely!

Police Task Force Project Jun 25 2020 This paper was prepared to guide the (1967) President's Commission on Law Enforcement and Administration of Justice. It recommends standards for police selection, recruitment, promotion, and job motivation. The section of selection and recruitment deals with minimum qualifications, manpower recruitments, screening and examining. And induction and placement, and recommends a probationary period. The promotion section discusses eligibility requirements, screening and examining, and the probationary period. The final section, on motivation, deals with civil service, recognition and incentives, discipline, retention of personnel, nationwide portable pension programs, lateral entry, elimination of counter-productive attitudes and environments, certification programs and concepts of police professionalization.

Hiring, Promotion, Retention and Overall Representation of Minorities, Women and Disabled Persons Within the Intelligence Community Jan 01 2021

Recruitment and Promotion Feb 26 2023 Have you found it hard to hit the jackpot when hunting for a job? Do you really understand what the recruiters are looking for when you apply for a job? To what extent do you think social ties are crucial in recruitment, job hunting and promotion processes? This book aims to explore the mechanisms involved when recruiters recruit new staff members, job hunters hunt for a new job and employees seek for promotion. In particular, via in-depth interviews with 40 staff members in publishing sector in the UK, the author studied the circumstances in which recruiters and job hunters use social ties in the recruitment and promotion

processes. This book does not only contribute to the theoretical discussion in so but also helps the readers to explore the insider perspective of the job market. As this is a case study of the publishing sector in the UK, the findings should be able shed light on other industrial sectors and across the board. This book should help achieve more effective results for job hunters, HR staff members and recruiters general in the future.

Internal Promotion Versus External Recruitment April 04 2021

Propaganda and Public Relations in Military Recruitment Aug 28 2020 This book represents the first international investigation of military recruitment advertising, public relations and propaganda. Comprised of eleven case studies that explore mobilisation work in Africa, the Americas, Asia and Europe, it covers more than a hundred years of recent history, with chapters on the First and Second World War, the Cold War, and the present day. The book explores such promotion in countries both large and small, and in times of both war and peace, with readers gaining an insight into the different strategies and tactics used to motivate men, women and occasionally even children to serve and fight in many parts of the world. Readers also learn about the crucial but little-known role of commercial advertising, public relations and media professionals in the production and distribution of recruitment promotion. This book, the first of its kind to be published, will explore that role, the process address two questions that are central to studies of media and communication: do militaries encourage civilians to join up, and are they successful in doing so? A multi-disciplinary project intended for a diverse academic audience, including postgraduate students exploring aspects of war, propaganda and public opinion, researchers working across the domains of history, communications studies, communication studies, psychology, and philosophy.

Systemic Discrimination in Employment and the Promotion of Ethnic Equality 2022 This book argues that traditional complaint-based antidiscrimination laws are inherently inadequate to respond to systemic discrimination in employment. It examines the mechanisms and characteristics of systemic discrimination and the shortcomings of complaint-based laws. Yet these characteristics can also inform employers and government authorities of the kinds of preventive action that help alleviate systemic discrimination at the workplace. In its search for a rational government policy response to systemic discrimination, the book evaluates selected legal regimes which impose proactive obligations on employers to promote equality in the workplace. Proactive regimes are regulatory in nature, rather than adjudicatory.

They induce employer compliance through technical assistance, dialogue and regulatory pressure, rather than court orders. By examining the key elements of regimes the author explains why some proactive regimes function better than others and why proactive regimes function better than complaint-based laws in addressing systemic discrimination.

People, Risk, and Security Mar 23 2020 Lance Wright shows why business in the 21st century requires a new understanding of the intersection of risk, security, and human resource management. He argues that these areas should no longer be considered separate processes, handled by technical specialists with limited spheres of expertise. People, risk and security management should be treated as a critically important, integrated business management system. People may be your greatest asset – but they can also be your biggest liability. They expose you to all sorts of risks – risks from things they can do (or fail to do) and from things that can be done to them. No matter how tight a risk and security management policy may be in theory, it can fail on contact with reality if it doesn't understand the people involved. Wright understands people, risk and security like few others. For years he was in charge of people management for leading oil companies – getting people into and out of some of the most dangerous and hostile work environments on the planet – and keeping them safe while they were there. Then he was responsible for a private army, literally licensed to kill, guarding nuclear submarines that were being decommissioned as part of the Megatons to Megawatts program. Risk is more than a set of formulas. Security is more than guns, gates, and badges. Both ultimately come down to the people you are responsible for. One day, the depth of your understanding of that connection makes the difference between you and disaster.

Report on the Recruitment, Training and Promotion of Administrative and Clerical Staff in the Hospital Service Nov 11 2021

Nelson's Navy Apr 23 2020 "In this insightful work, Dr. Nicholas Slope, naval historian and archaeologist, presents a social history of the Royal Navy during the reign of Vice Admiral Nelson. He analyses the muster, pay and log books of three Royal Navy Frigates, HMS Trent, Amazon and Glenmore, during the Revolutionary and Napoleonic wars, using computer databases to explore life on board from 1793-1805. This book covers themes such as recruitment, officer development, child labour, promotion, desertion and death..." --Back cover.

Recruitment, Promotion, and Affirmative Action Nov 30 2020 Managing Human Resources: Local Government Cases: Recruitment, Promotion, and Affirmative Action describes one local government's attempt to improve its policies and procedures governing promotion in its police and fire departments. This e-book also highlights

role played by the forces of affirmative action.

Promotion, Recruitment and Retention of Members in Nonprofit Organizations 2022 Although research on the value of membership of Nonprofit Organizations (NPOs) is increasing, there remain few theoretical and empirical advances in this area. Addressing this gap, this book offers a fresh perspective, exploring how NPOs' survival is linked to the promotion, recruitment and retention of members.
