The Sociology of Educational Ideas Nov 20 2019 This study, first published in 1973, examines the principles that lie behind educational dilemmas, and helps to clarify the difficulties of explanation, justification and practical action in the educational system. The author explores various key concepts in the education process, such as Intelligence, Equal Opportunity, Knowledge and Selection. She shows that different and often contrasting interpretations of these concepts imply certain assumptions about the nature of man, the genesis and knowledge, the education process and its relation to society. This title will be of interest to students of sociology and education.

150 ECG Problems E-Book May 07 2021 This book offers 150 12-lead ECGs and rhythm strips,

each with a clinical case history and question. The full ECG is reproduced and a study of it with the case history should be enough to give an answer. On the back the case is examined, with a description of the main features of the ECG along with a clinical interpretation and a "what to do" section. The cases are graded in difficulty. The unique page size allows presentation of all 12-lead ECGs across a single page for clarity. Several of the cases incorporate chest X-rays and coronary angiograms illustrating the appearances that are associated with various cardiac conditions. All the cases are graded in difficulty and are cross-referenced to the new editions of ECG Made Easy and ECG in Practice for further information. For this Fourth Edition over 30 new ECGs have been included, mainly to provide clearer examples, though the book deliberately retains some technically poor records to maintain a 'real-world' perspective.

Cumboto Mar 05 2021 This richly orchestrated novel, which won a national literary prize in the author's native land, Venezuela, also earned international recognition when the William Faulkner Foundation gave it an award as the most notable novel published in Ibero America between 1945 and 1962. Cumboto's disturbing story unfolds during the early decades of the twentieth century on a Venezuelan coconut plantation, in a turbulent Faulknerian double world of black and white. It records the lives of Don Federico, the effete survivor of a once vigorous family of landowners, and his Negro servant Natividad, who since the days of their mutual childhood has been his only friend. Young Federico, psychologically impotent and lost to human contact, lives on as a lonely recluse in the century-old main house of "Cumboto," surrounded by descendants of African slaves who still manage, despite his apathy, to keep the plantation on its feet. Natividad's heroic and selfless struggle to redeem his friend by awakening him to the stirrings of the earth and life about him sets in motion a series of events that are to shatter Federico's childlike world: a headlong love affair with a voluptuous black girl, her terrified flight in the face of the bitter condemnation of her own people, and the unexpected appearance, twenty years later, of their extraordinary son. Throughout the novel runs a recurring theme: neither race can survive without the other. Black and white, Díaz Sánchez suggests, embody contrasting aspects of human nature, which are not inimical but complementary: the languid intellectualism of European culture must be tempered with the indestructible vitality and intuition of the African soul if humanity is ever fully to comprehend the living essence of the world.

Gender Representation in Learning Materials Feb 22 2020 Representations of gender in learning materials convey an implicit message to students about attitudes towards culturally appropriate gender roles for women and men. This collection takes a linguistic approach to exploring theories about gender representation within the sphere of education and textbooks, and their effects on readers and students within an international context. In the opening section, contributors discuss theories of representation and effect, challenging the conventional Althusserian model of interpellation, and acknowledging the challenges of applying Western feminist models within an international context. Following chapters provide detailed analyses focusing on a number of different countries: Australia, Japan, Brazil, Finland, Russia, Hong Kong, Nigeria, Germany, Qatar, Tanzania, and Poland. Through linguistic analysis of vocabulary associated with women and men, content analysis of what women and men say in textbooks, and discourse analysis of the types of linguistic moves associated with women and men, contributors evaluate the extent to which gendered representations in textbooks perpetuate stereotypical gender roles, what the impact may be on learners, and the ways that both teachers and learners interact and engage with these texts.

Teaching Against Global Capitalism and the New Imperialism Apr 06 2021 This book will address a number of urgent themes in education today that include multiculturalism, the politics of whiteness, the globalization of capital, neoliberalism, postmodernism, imperialism, and current debates in Marxist social theory. The above themes will be linked to critical educational praxis, particularly to teaching activities within urban schools. Finally, the book will develop the basis for a wider political project directed at resisting and transforming economic exploitation, cultural homogenization, political repression, and gender inequality. Recent and widespread scholarly attention has been given to the unabated mercilessness of global capitalism. Little opposition exists as capital runs amok, unhampered and undisturbed by the tectonic upheaval that is occurring in the geopolitical landscape that has recently witnessed the collapse of the Soviet Union and the regimes of the Eastern Bloc. As we examine education policies within the context of economic globalization, we attempt to address the extent to which the pedagogy and politics of everyday life has fallen under the sway of what we identify as cultural and economic imperialism. Finally, the book raises a number of urgent questions: What are the current limitations to educational reform efforts among the educational left? What are some of the problems associated with certain developments within postmodern education? How can a return to Marxist theory and revolutionary politics revitalize the educational left at a time when capitalism appears to be unstoppable? What actions need to be taken in both local and global arenas to overcome the exploitation that the globalization of capital has wreaked upon the world?
