The explanations are straight forward and easy to understand with photographs, diagrams, schematics. The flight operations section includes standard practices for normal, abnormal and emergency flight operations, including performance planning, and sample worksheets.

THE BOYS WHO BRING IN THE CROP is a mostly true story about a group of amateur marijuana smugglers who operated out of Florida in the mid seventies. These guys really had some cajones, they did their thing right under the noses of the law. They made seven flights to Colombia and back and never got caught, partly because they were smart and planned well, partly because of dumb luck. The book is fast paced, it all takes place in less than one year. Along the way there is plenty of adventure, not everything goes as planned. There is some romance thrown in, these guys knew how to enjoy life with the piles of money they accumulated.

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. This book—prepared by the Federal Aviation Administration—is a resource without equal for glider pilots. Covering components and systems, flight instruments, performance limitations, preflight and ground operations, launch and recovery procedures, flight maneuvers, traffic patterns, soaring weather, radio navigation, and much more, it lays out in authoritative detail the science, mechanics, and regulations that every pilot needs to know. Plus, it contains a glossary of essential terms and crystal-clear color illustrations. No one should learn to fly, or fly a glider, without this information close at hand. A detailed guide to the popular Cessna 210 aircraft. The book provides straight forward, easy to understand explanations of the aircraft, systems and flight operations including performance planning, with photographs, diagrams, schematics and checklists. The information has been compiled from engineering manuals, manufacturers handbooks, and the authors' personal in depth flight experience. The book is ideal for use when learning to fly on the C210 or during type transition training, and a experienced pilots will also find useful tips and information to improve their standards. The book is aimed at Cessna 210 pilots, however enthusiasts, virtual pilots, and engineers can also enjoy the information provided. The book is often used by commercial operators as part of their induction or transition training on the C210. "In this book the author details the 12 Jan 89 arrest and

subtle torture of John Hull on the completely fabricated charge that he shipped narcotics from his ranch in Muelle, Costa Rica. The entire history of the fabrication, from its beginnings at Pocosol to its culmination in the television fantasy, West 57th Street, is told. An innocent man has suffered torture and indignity which led to a near-fatal heart attack from which he will never recover. Because no one, either in the United States or in Costa Rica, has ever revealed the details of this conspiracy, Hull and any number of other innocent people still face imprisonment, financial destruction and death."
