Essential Public Affairs for Journalists is the definitive handbook for journalism students looking for a firm foundation in their understanding of central and local government in the UK. The book guides readers through the constitutional framework and the governing institutions of the United Kingdom before considering the electoral system and the principal political parties. A number of key topics are discussed, including COVID-19 and healthcare, Brexit, education, housing, transport, and social security. James Morrison seamlessly depicts how these services operate while educating readers on how informative news stories are generated in the public eye. Every chapter ends with a helpful summary of 'take-home points', allowing students to recap on areas that are likely to be examined. 'Current issues' are also offered as thinking points for students in considering how governance of the UK interacts with public and cultural affairs. Digital formats and resources The seventh edition is available for students and institutions to purchase in a variety of formats, and is supported by online resources. The e-book offers a mobile experience and convenient access along with functionality

There are so many women, who are silently baring the harassment both in personal and professional life because of the lack of education, lack of legal awareness and disbelief. In a patriarchal society that we live in women need to develop identity of their own to abridge the gender gap for a healthy environment. Simply, they are the most potential and capable resource on earth that are untapped and are not aware of the right they deserve. And this is why we need women empowerment. The Indian government also admits that the reasons behind the declining Child Sex Ratio in the country, primary the socio-cultural mindset having preference for son, considering girls as burden. Many agencies of United Nations in their reports have emphasized that gender issue is to be given utmost priority. It is held that women now cannot be asked to wait any more for equality. The vitality of the issues compels our society not only to think over it but to act upon. This is a short account of what we wanted to write without revealing the crux of what we want the audience to understand from our first ever book. Parliament is the place where thoughts are put in actions. Often we find ourselves unaware of many schemes which are being implemented by the government. Since the parliament has the best coverage on government schemes about women issues, so we decided to write down the details which came across the parliamentary discussions and forward it to the people who want to know about what government is doing for the welfare of women. This attempt came in this form (Women in Parliament: Issues and Discussion). The content of the book is based on the information provided by the Women and Child Development Minister in the house while replying to the questions regarding women issues asked by the MPs. In the first section of the book, various schemes which are being implemented by the government for the welfare of women are discussed while the section II deals with the fund allotted for the implementation of the women welfare schemes. In section III, the issues discussed are still a big concern for the government and the society. The next section is dedicated to the issues related to the widows while the final section deals with the miscellaneous issues. Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of

parenting policy, research, and practice in the United States. Student affairs professionals are critical to the efforts to improve students' experiences and outcomes--especially in two-year institutions. This volume explores the history of student development and college impact theories and models in relation to two-year institutions. Topics covered include: analysis of the applicability of the literature for diverse and current community colleges and student populations, implications for practitioners, and presentation of alternative models and lenses. This is the 174th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission. This book addresses specific concerns of females affected by multiple sclerosis, where women are disproportionately impacted by the disease. MS is an autoimmune disease of the central nervous system affecting young adults of reproductive age. This book presents the current understanding of genetic variables, hormonal influences, immunological milieu and neurological outcomes, discussing issues such as fertility, pregnancy management, and menopause, as well as end of life care and mortality in women with MS. With contributions by international experts, this interdisciplinary book will serve as a useful reference and guide for MS specialists, general neurologists, obstetricians/gynecologists, physicians in training, family practice doctors, clinical nurse specialists in multiple sclerosis, and all other healthcare professionals involved in the care and treatment of women affected by MS. In the twentieth century Japan emerged as one of the world's leading economic powers: rising from wartime destruction to a leading economic engine in world markets. Japan's economic aid policy, beginning with war reparations following its defeat in World War II, became a vehicle to help achieve this economic success. As the country continued to flourish, economic aid also became a means of expanding the country's influence in an era of increasing globalization, providing an alternative strategy for helping developing nations escape the traps of poverty: a strategy drawn from its own experience of reemergence. And as we stand at the beginning of a new century, Japanese aid policy may also serve as a potential model for other nations who are on the cusp of entering high-income status and the group of elite world donors: a model that in many ways lies in contrast to policies espoused by other advanced Western nations. The book *Japan's Aid* examines the strengths and weaknesses of Japanese aid policy in all of these dimensions: in fostering economic growth in both its own economic success story and in the numerous countries to which it has served as the single largest bilateral donor over many years; and as a policy that other nations might emulate. Through a combination of insightful case studies and

rigorous econometric investigation, the book presents a comprehensive examination of the pros and cons of Japan's aid. Provides a light-hearted test of your knowledge of opera facts and trivia In the southern German city of Stuttgart lives a pious Muslim population that has merged with the local population to create a meaningful shared existence. In this ethnographic account, the author introduces and examines the lives of ordinary residents, neighborhoods, and mosque communities to analyze moments and spaces where Muslims and non-Muslims engage with each other and accommodate their respective needs. These accounts show that even in the face of resentment and discrimination, this pious population has indeed become an integral part of the urban community. This book is about all our futures and demonstrates how essential insights from political psychology can nurture and safeguard democracy. There is expanding global interest in the relationship between the psychological and the social. The bringing together of affect, emotion and feeling with social, political and cultural forces offers a creative, innovative and rich set of ways of understanding what Charles Wright Mills called the links between personal troubles and public issues. This book is an introduction to psychosocial studies. Drawing on different approaches to the field, the book introduces the main theoretical influences on psychosocial studies and their development and impact, through - for example - concepts such as the unconscious, self and identity, affect, emotion and the cultural and social unconscious. It explores the theoretical frameworks of psychosocial studies, and psychosocial research methods. The book offers examples of case studies which illustrate the diversity of psychosocial studies and what makes it distinctive. It asks: what is social about the inner worlds of the psychological? What is psychological and psychic about social worlds and social life? This clear, accessible introduction will be of interest to students and researchers across the social sciences and humanities, in particular in sociology, psychology, cultural geography, social policy and politics and cultural studies. The Routledge Companion to Digital Journalism Studies offers an unprecedented collection of essays addressing the key issues and debates shaping the field of Digital Journalism Studies today. Across the last decade, journalism has undergone many changes, which have driven scholars to reassess its most fundamental questions, and in the face of digital change, to ask again: 'Who is a journalist?' and 'What is journalism?'. This companion explores a developing scholarly agenda committed to understanding digital journalism and brings together the work of key scholars seeking to address key theoretical concerns and solve unique methodological riddles. Compiled of 58 original essays from distinguished academics across the globe, this Companion draws together the work of those making sense of this fundamental reconceptualization of journalism, and assesses its impacts on

journalism's products, its practices, resources, and its relationship with audiences. It also outlines the challenge presented by studying digital journalism and, more importantly, offers a first set of answers. This collection is the very first of its kind to attempt to distinguish this emerging field as a unique area of academic inquiry. Through identifying its core questions and presenting its fundamental debates, this Companion sets the agenda for years to come in defining this new field of study as Digital Journalism Studies, making it an essential point of reference for students and scholars of journalism.

Getting the right diagnosis is a key aspect of health care - it provides an explanation of a patient's health problem and informs subsequent health care decisions. The diagnostic process is a complex, collaborative activity that involves clinical reasoning and information gathering to determine a patient's health problem.

According to *Improving Diagnosis in Health Care*, diagnostic errors-inaccurate or delayed diagnoses-persist throughout all settings of care and continue to harm an unacceptable number of patients. It is likely that most people will experience at least one diagnostic error in their lifetime, sometimes with devastating consequences. Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment, providing unnecessary or harmful treatment, or resulting in psychological or financial repercussions. The committee concluded that improving the diagnostic process is not only possible, but also represents a moral, professional, and public health imperative. *Improving Diagnosis in Health Care*, a continuation of the landmark Institute of Medicine reports *To Err Is Human* (2000) and *Crossing the Quality Chasm* (2001), finds that diagnosis-and, in particular, the occurrence of diagnostic errors"has been largely unappreciated in efforts to improve the quality and safety of health care. Without a dedicated focus on improving diagnosis, diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity. Just as the diagnostic process is a collaborative activity, improving diagnosis will require collaboration and a widespread commitment to change among health care professionals, health care organizations, patients and their families, researchers, and policy makers. The recommendations of *Improving Diagnosis in Health Care* contribute to the growing momentum for change in this crucial area of health care quality and safety.

Family caregiving affects millions of Americans every

day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults. The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little. As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right. Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better. Who were the original Goons? What is happening when presenters 'crash the pips'? Which radio programme has featured guest appearances by the Duchess of Cornwall, Alan Titchmarsh, Mike Gattling and Kirstie Allsopp? From Farming Today at sunrise to the gentle strains of 'Sailing By' and the Shipping Forecast long after midnight, Radio 4 provides the soundtrack to life for millions of Britons. In For the Love of Radio 4: An Unofficial Companion, Caroline Hodgson celebrates all that's best about the nation's favourite spoken word station, taking us on a tour through its history, its key personalities and programmes, and countless memorable moments from the archives. "The only text to combine academic and practitioner perspectives with evidence based case studies to reveal what really goes on behind the scenes of Parliament. processes and actors." -- The first English-language scholarly book to provide an overview of the Angela Merkel's career and influence. INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." -Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017. This breathtakingly exciting book discovers Ireland, county by county, as you've never seen it before! As politicians and the media perpetuate the stereotype of the "common criminal," crimes committed by the powerful remain for the most part invisible, or are reframed as a "bad decision" or a "rare mistake." This is a topic that remains marginalized within the field of

criminology and criminal justice, yet crimes of the powerful cause more harm, perpetuate more inequalities, and result in more victimization than street crimes. Crimes of the Powerful: An introduction is the first textbook to bring together and show the symbiotic relationships between the related fields of state crime, white-collar crime, corporate crime, financial crime, organized crime, and environmental crime. Dawn L. Rothe and David Kauzlarich introduce the many types of crimes, methodological issues associated with research, theoretical relevance, and issues surrounding regulations and social controls for crimes of the powerful. Themes covered include: media, culture, and the Hollywoodization of crimes of the powerful; theoretical understanding and the study of the crimes of the powerful; a typology of crimes of the powerful with examples and case studies; victims of the crimes of the powerful; the regulation and resistance of elite crime. An ideal introductory text for both undergraduate and postgraduate students taking modules on the crimes of the powerful, white-collar crime, state crime, and green criminology, this text includes chapter summaries, activities and discussion questions, and lists of additional resources including films, websites, and additional readings. This book uses the law of judicial review to identify and to explain these principles, and shows how they ought to be worked out in the private law of tort and contract, in administrative tribunals, and in non-judicial techniques such as investigations by ombudsmen, and the work of auditors and other government agencies. This book explores how Bangladeshi women from poor and undereducated/semi-educated backgrounds who have crossed the Indo-Bangladesh border find themselves in prisons serving sentences under the Foreigners Act, 1946. Drawing on original fieldwork, this book explores these women's understanding of borders and state sovereignty and how the women - from conservative rural and semi-rural backgrounds which impose a strict moral code - adjust to the socio-cultural context of an Indian prison, where being an inmate is "dishonourable" in their community. This book examines the implicit challenge in these women's action and decisions to these codes of honour, to accepted social norms of their religion and community, and ultimately, the dominantly patriarchal system that marks South Asian society. Further, it focuses on the negotiations that the Bangladeshi women make with the social and political borders they encounter in the process of crossing the Indo-Bangladesh border without requisite documents needed by the state for entry into a "foreign" land; how they cope with the daily challenges of living during their imprisonment in a correctional home; and their feelings about their impending return to Bangladesh. Women who are apprehended and criminalised for crossing borders must negotiate with not only the normative understanding of borders which is inherently masculine in nature, but also the gender biased lens through which female mobility is viewed: therefore, they not only cross political borders but also social borders. This book maps the associations between women's experiences of mobility and incarceration, and their linkages with social and political borders and the fraught experiences of being in a 'foreign' territorial space. It will be important reading for criminologists, sociologists, and those engaged in penology, women's studies and migration studies.
