Writing in Elementary School Social Studies Feb 18 2022 This book is designed to provide elementary school teachers with information, suggestions, and models for using writing in the social studies, from early primary to middle grades. There are four major chapters to the book. Chapter I is titled "Research on the Teaching of Writing." The articles in this first section move from a survey of research in writing to a survey of classroom practice in the use of writing in elementary school social studies and finally to a specific classroom study that integrates the two areas and presents specific implications for the study and teaching of writing. Chapter II is titled "Developing Readiness in Writing." The first two articles stress two important aspects of a classroom environment that

nurtures and supports student writing. The remaining five articles describe techniques such as interviewing, exploring the past, and brainstorming that teachers can use to initiate writing. The title of Chapter III which contains seven articles is "Using Writing to Learn Social Studies Content." The articles describe ways in which writing can be used to help students learn social studies information or develop social studies generalizations. Another describes how writing can be used to conduct simulated field trips in the social studies classroom. The title of Chapter IV is "Combining Writing with Social Studies." Discussed are three essential supports for a successful program: a detailed curriculum guide, inservice teacher training, and cooperative teacher/administrator assessment procedures. The book also cites related resources in the ERIC system. (Author/RM)

Abraham Lincoln's Cyphering Book and Ten other Extraordinary Cyphering Books Nov 15 2021 This well-illustrated book provides strong qualitative and comparative support for the main arguments developed by Nerida Ellerton and Ken Clements in their groundbreaking *Rewriting this History of School Mathematics in North America 1607–1861: The Central Role of Cyphering Books*. Eleven extraordinary handwritten school mathematics manuscripts are carefully analyzed—six were prepared entirely in Great Britain, four entirely in North America, and 1 partly in Great Britain and partly in North America. The earliest of the 11 cyphering books was prepared around 1630, and the latest in 1835. Seven of the manuscripts were arithmetic cyphering books; three were navigation cyphering books, and one was a mensuration/surveying manuscript. One of the cyphering books examined in this book was prepared, over the period 1819–1826, by a young Abraham Lincoln, when he was attending small one-teacher schools in remote Spencer County, Indiana. Chapter 6 in this book provides the first detailed analysis of young Abraham's cyphering book—which is easily the oldest surviving Lincoln manuscript. Another cyphering book, this one prepared by William Beattie in 1835, could have been prepared as a special gift for the King of England. The analyses make clear the extent of the control which the cyphering tradition had over school mathematics in North America and Great Britain between 1630 and 1840. In their final chapter Ellerton and Clements identify six lessons from their research into the cyphering tradition which relate to present-day circumstances surrounding school mathematics. These lessons are concerned with sharp differences between intended, implemented and attained curricula, the remarkable value that many students placed upon their cyphering books, the ethnomathematical circumstances which surrounded the preparations of the extraordinary cyphering books, and qualitative differences between British and North American school mathematics.

Special emphasis is provided for conducting research in culturally complex communities, based on the perspectives of feminists, ethnic/racial minorities, and people with disabilities. Each chapter carefully explains a step of the research process from literature review to analysis and reporting. Additionally, sample studies and abstracts are included in each chapter to illustrate the concepts discussed in that section of the book.

Herndon on Lincoln Jul 11 2021 After Abraham Lincoln's assassination in 1865, William H. Herndon began work on a brief, "subjective" biography of his former law partner, but his research turned up such unexpected and often startling information that it became a lifelong obsession. The biography finally published in 1889, Herndon's Lincoln, was a collaboration with Jesse W. Weik in which Herndon provided the materials and Weik did almost all the writing. For this reason, and because so much of what Herndon had to say about Lincoln was not included in the biography, David Donald has observed, "To understand Herndon's own rather peculiar approach to Lincoln biography, one must go back to his letters." An exhaustive collection of what Herndon was told by others about Lincoln was published by Douglas L. Wilson and Rodney O. Davis in Herndon's Informants: Letters, Interviews, and Statements about Abraham Lincoln . In this new volume, Wilson and Davis have produced a comprehensive edition of what Herndon himself wrote about Lincoln in his own letters. Because of Herndon's close association with Lincoln, his intimate acquaintance with his partner's legal and political careers, and because he sought out informants who knew Lincoln and preserved information that might otherwise have been lost, his letters have become an indispensable resource for Lincoln biography. Unfiltered by a collaborator and rendered in Herndon's own distinctive voice, these letters constitute a matchless trove of primary source material. Herndon on Lincoln: Letters is a must for libraries, research institutions, and students of a towering American figure and his times.

Abraham Lincoln and the Structure of Reason Jun 22 2022 The secrets of one of history's greatest orators are revealed in "one of the most stunningly original works on Abraham Lincoln to appear in years" (John Stauffer, professor of English and history, Harvard University). For more than 150 years, historians have speculated about what made Abraham Lincoln truly great. How did Lincoln create his compelling arguments, his convincing oratory, and his unforgettable writing? Some point to Lincoln's study of grammar, literature, and poetry. Others believe it was the deep national crisis that gave import to his words. Most agree that he honed his persuasive technique in his work as an Illinois attorney. Here, the authors argue that it was Lincoln's in-depth study of geometry that made the president's verbal structure so effective. In fact, as the authors demonstrate, Lincoln embedded the ancient structure of geometric proof into the Gettysburg Address, the Cooper Union speech, the first and second inaugurals, his legal practice, and much of his substantive post-1853 communication. Also included are Lincoln's preparatory notes and drafts of some of his most famous speeches as well as his revisions and personal thoughts on public speaking and grammar. With in-depth research and provocative insight, *Abraham Lincoln and the Structure of Reason* "offers a whole new angle on Lincoln's brilliance" (James M. Cornelius, Curator, Lincoln Collection, Abraham Lincoln Presidential Library and Museum).
